Director Hannigan:

Please chart a "smarter course" for California through the "CALFED Bay/Delta" program—a plan for how to protect and use California's water resources for the next 50 years.

I am requesting that you choose to:

1. IMPROVE WATER QUALITY
2. PROTECT OUR WATERSHEDS AND FISHERIES
3. MAKE OUR COMMUNITIES SELF-RELIANT

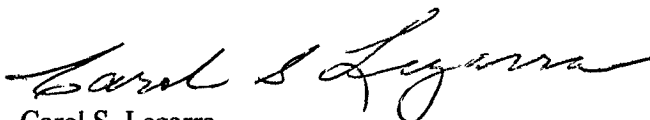

It is my opinion, (as well as others), that we must invest in water efficiency before considering new dams or reservoirs.

We need to restore our rivers, bays and fisheries by providing fresh adequate water and caring for the land around the rivers.

We must improve our water quality for the people and the wildlife by enforcing pollution limits.

Last, but not least, we must stop making California taxpayers pay for the bill for studies of new dams and reservoirs that flood valuable habitat and remove needed water from our rivers.

Respectfully,

Carol S. Legarra
